

Announcement of Joint Lectures on “Applications of Multispectral Imaging in the Long-Term Preservation of Cultural Heritage” by Guest Speakers Ken Boydston and Henry Wilhelm at the Canadian Photography Institute of the National Gallery of Canada on Tuesday Afternoon, January 31, 2017, in the Lecture Hall at the National Gallery from 2:00–4:00 pm. Hosted by John P. McElhone, Chief, Conservation and Technical Research at the National Gallery of Canada and the Canadian Photography Institute.

Bringing the Past to Light – Multispectral Imaging in the Forensic Discovery and Long-Term Monitoring of Cultural Heritage Materials: The Dead Sea Scrolls in Israel; President Abraham Lincoln’s Gettysburg Address; The David Livingston Africa Diaries; and Other Historical Documents and Objects

By Ken Boydston, Chief Color Scientist and President of MegaVision Inc., Santa Barbara, California U.S.A.
